The first of these is the fact that the
 system is not a simple one, but a complex one.
 It is a system of many parts, each of which
 has its own function, and all of which are
 interrelated. The second fact is that the
 system is not a static one, but a dynamic one.
 It is a system that changes and evolves over
 time. The third fact is that the system is not
 a closed one, but an open one. It is a system
 that interacts with its environment. The fourth
 fact is that the system is not a linear one, but
 a non-linear one. It is a system in which the
 whole is greater than the sum of its parts.
